1 Year return to base warranty

>>> High Performance Thermal Disc Auto Printer

Teac, introduce the new high-performance Teac P55 DiscAthlon II Thermal Auto Printer. With one or two Teac P55 thermal printers and its 300 disc input capacity the DiscAthlon gives you a consistently high throughput.

Its smooth and robust robotics allows fully unattended 24/7 production. Along with the user friendly label editing software and world's finest professional thermal colour printer brings CD/DVD printing to a new level.

The Teac P55 produces the finest photo quality professionally printed CD/DVD media. Thanks to its innovative thermal re-transfer 4 colour print technology, full colour CMYK discs can be created quickly and effortlessly. Not only does it produce an outstanding glossy finish, once printed the discs become scratchproof, UV protected and water resistant. Ask for your free P55 print sample now and discover the next generation in CD/DVD printing.
